The "Matching Letter with Correct Picture" preschool activity is a fun, hands-on way for young children to learn letters and associate them with words that begin with those letters. Here's how the activity is typically structured:

Materials Needed:

- Printable Worksheet (provided)
- Scissors
- Glue or glue sticks

Activity Instructions:

1. Cut Out the Pictures:

- Have the child cut out each picture. If needed, an adult can assist with cutting.

2. Glueing the Pictures:

- Give the child a letter grid or construction paper where they can match the pictures to the correct letters.
- Ask them to identify the letter on each card and then find the picture that starts with that letter.
- Once the child finds the matching picture, they should glue it next to the correct letter.

3. Learning Opportunity:

- As the child works, encourage them to say the name of the letter and the object, reinforcing letter-sound associations.
- For example, when matching the letter "A," the child can say, "A for apple."
- This will help develop both letter recognition and phonemic awareness.

This activity helps improve fine motor skills (through cutting and gluing), letter recognition, and understanding of the alphabet and sounds.
